About Apollo Valves:

Conbraco Industries was created when two Detroit-based manufacturers of brass valves and fittings merged in 1928 forming Consolidated Brass Company. Almost ninety years later, Conbraco Industries, Inc. is a leading manufacturer of American Made flow control products for US and International Markets.

Conbraco, now known as Apollo® Valves, has earned a reputation for developing new products to meet emerging market demands. In 2005, the company brought all of its products under the Apollo® Valves brand which includes ball valves, butterfly valves, backflow prevention devices, water pressure reducing valves, mixing valves, safety relief valves, water gauges, strainers, vacuum breakers, valve actuators, and more.

While some see valve manufacturing as a mature industry, Conbraco sees continuous opportunities for innovation. The company is constantly developing and introducing new products. By focusing on quality and problem-solving innovations, Apollo Valves continues to thrive. Apollo Conbraco employees are proud of Conbraco's eight decades of tradition and the quality and reliability of the Apollo Valves name, and are prepared to achieve even more in the future.

M&M Control is a stocking distributor for Apollo Flow Control Products.
