M&M Distributes the Finest Names in the Industry!

What do egg-beaters, steam engine locomotives, and [Kunkle Valve](#), our Featured Manufacturer for this month, have in common?

Erastus B. Kunkle worked for the Pennsylvania Railroad during a time when serious injury and mechanical problems could result from over-pressure of the locomotive engine. In 1875, E. B. Kunkle invented the "lock-up safety valve" designed to relieve engine pressure, which revolutionized the industry.

In addition to the Kunkle valve, Erastus Kunkle also developed a water gauge, gauge-cock, steam gauge, and, patented on Sept. 5, 1871, a "new and improved egg-beater, provided with self-acting valves!"

Today, [Kunkle Valve](#) is a leading manufacturer of quality safety and relief valve products for industrial and commercial applications, including steam, air, liquid, cryogenics and non-hazardous gases.
