March 2022 Featured Manufacturer

Made in the USA
 Since 1878

Steam & Fluid Specialty Products

Watson McDaniel is a one-stop source of industrial steam and fluid specialty products. The company has manufactured high-quality steam and fluid specialty products for the industrial marketplace since 1878.

Watson McDaniel's HD Series Pilot-Operated Regulating Valves were designed for extremely accurate control of temperature and pressure in steam service applications. The HD-Series is made of Ductile Iron for extended pressure and temperature ratings. These regulators use several different control pilots which are mounted to the valve to control pressure, temperature, or a combination of both.

Steam Traps are essential components of any steam system to discharge condensate, air, or other non-condensable gases from a steam system while preventing the loss of steam. **Watson McDaniel** offers an extensive line of steam traps such as Thermodynamic, Thermostatic, Float & Thermostatic (F&T), and Inverted Bucket to handle any application.
