The [Spence Engineering Company](#) was founded in 1926 by Paulsen Spence in Walden, New York. Paulsen Spence developed the original patent for the normally closed external pilot operated packless pressure regulator. This design is the basis for the products offered today. Spence Engineering is a widely recognized leader in the steam regulator and flow control field. Spence regulators are used extensively for heating systems in buildings, institutions, and district heating systems as well as major industrial plants. Spence engineered steam specialty and fluid control products meet the changing needs of today's HVAC and industrial marketplaces.

[Spence's principal valve, the E Main](#), meets the requirements of a large majority of regulator installations as it can be controlled by various types of interchangeable pilots. Spence regulators are known for their universal adaptability, accurate regulation, dependable service, and low maintenance costs.

The company's broad range of [Safety Relief Valves](#) meet ASME Boiler and Pressure Vessel code requirements. They provide over-pressure protection for steam, air, gases, vapors, water, liquids, and powdered solids. Set pressures up to 300 psi for steam and up to 900 psi for air and gases.

[Control Valves](#) are offered in a diverse selection of control valves for a wide range of applications. Models include the "Intimidator" Type J Valve, the "Kombat" Series K Valve, and the "BOSS" D Valve Series. Pneumatic and electric actuator models give you the option on 0-20 psig, 3-15 psig, 4-20 mA, 0-10 VDC, and Split Ranged input signals.

Spence also offers [Direct Operated Valves](#) for both pressure and temperature applications. The Series 2000 temperature regulator is the simple low cost solution for gradually changing and continuous loads for steam, gases, water, and other liquids.

M&M Control is a stocking distributor for Spence. For help with your application, call us at 800-876-0036.

M & M Control Service, Inc. is a leading distributor of pneumatic, electronic, and self-contained valves, controls, and process control equipment. Our commitment to quality products and exceptional customer service is renowned in the industry. Our sales engineers are factory trained to provide you with sizing, application, configuration, or installation assistance.

**FACTORY DIRECT PRICING!
PRODUCTS INCLUDE:**

Valves:

Gate, ball, butterfly, gas valves, solenoid, control, needle, water, steam, instrument, automatic, thermostatic, pneumatic, electronic, mixing, check, and relief valves.

Gauges:

Pressure gauges, utility gauges, process, industrial, commercial & contractor gauges, HVAC/R, and specialty gauges.

Controls & Controllers:

Pneumatic / electronic HVAC, process, combustion, PID, recorders (strip/circular/paperless), and indicators.

- Calibrators
 - Flow Meters
 - Regulators
 - RTDs
 - Transducers
 - Sensors
 - Steam Traps
 - Strainers
 - Thermocouples
 - Thermometers
 - Transmitters
