

Thermostatic Steam Traps

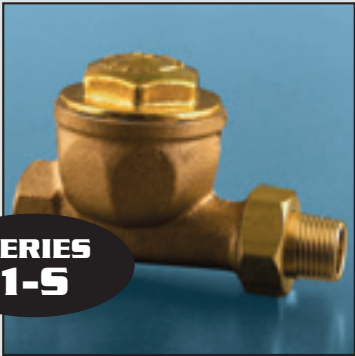

**SERIES
1-A**

MINI-TRAP

**SERIES
2-A**

**SERIES
1-5**

Marsh's line of Steam Traps are designed for years of trouble-free maintenance and removal of air and condensate. Highly efficient and economical. Compact diaphragm design guards against water hammer.

Usages:

- Steam radiators
- Convectors
- Heat exchangers
- Unit heaters
- Steam and air venting
- Specify low or high pressure
- Can be used as an air/steam elimination at the top of risers
- Vacuum, low and high pressure systems

Features:

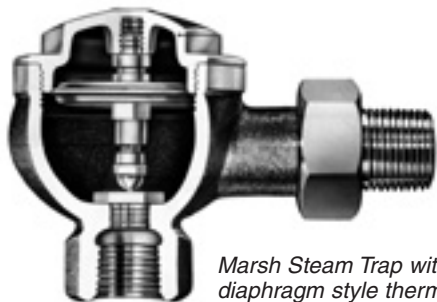

- Attractive hex designed body
- Ruggedly built
- Brass and bronze construction
- In the event of failure, fails in an "open" position

Options:

- Many patterns and designs available
- Specify low (15#) or high (125#) pressure
- Polished chrome plating
- See page 12 for range of sizes and patterns

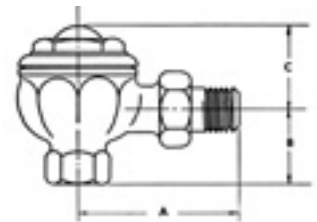

Materials:

- All brass/bronze construction
- Stainless steel seat and disk for higher pressure setting
