APRIL 2017

**M&M DISTRIBUTES THE FINEST NAMES IN THE INDUSTRY!** M&M Control Service, Inc. is a leading distributor of pneumatic, electronic, and self-contained valves, controls, and process control equipment. Our commitment to quality products and exceptional customer service is renowned in the industry.

**OUR FEATURED MANUFACTURER FOR THIS MONTH IS POWERS™.** Powers is one of the many premier names in Temperature Control we carry. The company has been a leader in the area of temperature control for more than a generation, and continues to streamline automatic temperature control, as demonstrated by the modern IntelliStation™ Digital Mixing System.

The IntelliStation is the smart delivery solution for mixing domestic water in a hot water recirculation loop. This digital water mixing valve is used in commercial and institutional facilities and can be integrated into a building automation system, or BAS. Controlling water temperature more precisely can also help reduce energy costs.

**IntelliStation™: The Smart Mixing & Recirculation System**

**Using the IntelliStation,** facilities managers can remotely monitor and control water temperatures to provide hot water consistently and on demand, wherever and whenever it is needed for domestic applications. The IntelliStation provides safer, more efficient hot water delivery from the point-of-source to the point-of-use and can be integrated into a building automation system (BAS).
