PARTS DEALER

DEPENDABLE, RUGGED, PRECISION CONTROL VALVES AND ACCESSORIES

## About Warren Controls

[More Info](#)

Warren Controls has been in the valve business for more than 50 years serving a wide variety of commercial, industrial, military and OEM customers. The first products Warren Controls offered were regulators designed for the HVAC and marine industries. Today, the company's product lines continue to grow through extensive product development and target marketing, and include product lines for Building Automation Control Valves, Industrial Process Valves up to ANSI Class 300, and Mechanical Level Controls for deaerators and boilers.

In 2015, Warren Controls introduced the **Monitrol** series of fluid control systems to manage flow, pressure and temperature control with precision sensors and innovative control algorithms. The system is comprised of an industrial grade electrically actuated modulating control valve, various process sensors and a dedicated controller with brilliant touchscreen display.

*Warren Controls continues to set the bar on new and innovative fluid control products.*
