

Temperature Control Valves

150-F Series

Sterlco's R-150-F (cooling) and 150-F (heating) valves have high engineering standards and energy saving features. Simple yet efficient design requires minimum maintenance; heavy-duty construction assures long valve life. Valves are temperature actuated, self powered, fully balanced and applicable to heating or cooling processes using water, oil, steam or other fluids.

- Self Contained, Completely Automatic: Simple to install and set temperature from a variety of ranges
- Compact Design: Requires minimum installation space with minimum piping requirements.
- Optional Broad: Temperature ranges 80° - 170°F, 110° - 190°F, 165° - 225°F (other ranges available- consult factory for details)
- Valve operates in any mounting position: upright, upside down, horizontal, and any angle.
