

Temperature Control Valves

56 Valves

The Sterlco Type 56 Pressure Actuated Water Regulating Valve features a compact, dependable design made from sturdy, brass alloy casting. That means you can count on many years of dependable service. Of course, you also get precise control. To accommodate pressures from 70 to 260 PSI without changing springs, simply turn the adjustment screw at the base of the valve. What's more, the valve has a wide adjustment range to accommodate current refrigerants. Factory tested prior to shipping, you can easily mount the valve in any position without mounting brackets.

- Precise control from 70 to 260 PSI.
- Sizes from 3/8 in. to 1 1/4 in. N.P.T.
- Accommodates all current refrigerants..
- Compact, versatile design.
- Easily mounted in any position.
