About Keckley: Established in 1914 with its initial focus on steam and liquid control equipment, Keckley continues to advance industry and commercial building installations, expanding its product line to fulfill the needs of the industry. Today, Keckley is a leading valve and strainer manufacturer.

Keckley offers ball valves, pipeline strainers, check valves, knife gate valves, float & lever valves, control valves, suction diffusers, and triple duty valves. Products are used in a wide variety of industries such as manufacturing and bottling facilities, airports and ships, steel mills, global pharmaceutical companies and petrochemical refineries, U.S. military facilities, dams, power generation, hospitals, and stadiums.

Keckley | Manufacturer of Valves & Strainers

Keckley has the solution you need for your application.

Strainers: Keckley's industrial and commercial pipeline strainers are designed for applications where protection from foreign matter in a pipeline is required. Y-strainers offer a compact and economical means of straining debris from pipelines. Simplex basket strainers are used in piping applications where a greater screen area to pipe area ratio is required. Keckley duplex continuous flow basket strainers are used where the process cannot be shut down for maintenance.

Float & Lever Valves: Keckley float and lever valves control the level of liquids through mechanical actuation. Float valves are actuated by the float ball, float rod, and lever assembly, and do not require any external power source. Lever valves are actuated through an external power source such as manual operation, float boxes/mechanisms, electric motors, or other actuators through linkage to the lever of the valve. The No. 7 and 77 pilot-controlled float valves are recommended when tight closing is essential.

Check Valves: Keckley liquid and gas pipeline check valves are designed for liquid or gas applications where protection from flow reversal in a pipeline is required. Check valve types include wafer body DD (double disc), wafer silent, and globe silent check valves.

M&M Control offers a full line of Keckley products. For additional product detail or for help with your application, please refer to our Keckley pages or give us at **1-800-876-0036!**
