

KEROTEST POLYBALL

There's a new opening at Kerotest.

Introducing the new Kerotest 12" POLYBALL® full port polyethylene ball valve. It's big and it delivers the highest flow of any 12" polyethylene ball valve made in America today. It's full of the big design, engineering and production benefits that have made us one of the leading manufacturers of polyethylene ball valves in North America.

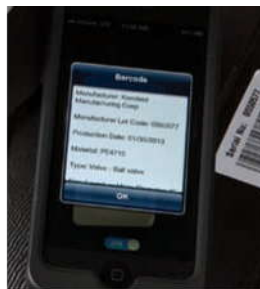

It's a big decision. Choose it, or any from our POLYBALL line, confidently.

Introducing the new Kerotest 12" POLYBALL[®] full port polyethylene ball valve.

OUR BIGGEST POLYETHYLENE VALVE YET, this new 12" POLYBALL features a 10.1" port opening to deliver the highest flow of any 12" polyethylene ball valve made in America today. Here are some of the big design, engineering and production benefits you can expect:

The gear box features a 6:1 ratio and is also sealed against outside contaminants making it virtually waterproof.

All POLYBALL valves now feature the new industry standard traceability code per ASTM F-2897 that allows instant access to individual valve specifications. With decoding software, simply scan the barcode to see the production date, size, material and valve type, lot code and more.

The big, new Kerotest 12" POLYBALL is available in SDRs from 9.0 to 21, is produced in an ISO certified facility and like all of our polyethylene valves, is manufactured right here in the USA. **Choose it, or any from our POLYBALL line, confidently.**

12" FULL PORT DIMENSIONS (Approx. Inches)					
A	B	C	D	E	Weight (lbs)
93	31.3	19.4	10.10	35	440
