This Month's Featured Manufacturer

TRERICE: Temperature. Pressure. Control.
 The Standard of Quality and Dependability.

H. O. Trerice provides the highest quality temperature and pressure instrumentation and controls available to the industry. In addition to regulators, control valves, and actuators, Trerice produces pressure gauges, temperature instrumentation, and commercial plumbing products. Trerice was one of the first manufacturers to provide lead-free pressure gauges across the product line.

Trerice gauges include process, industrial, specialty, utility, and commercial & contractor gauges as well as accessories. **Ask us about the 875 Series** that is designed for severe service applications. The one-piece forged brass case and socket withstands the harshest industrial applications. Glycerin fill is available to help protect against vibration and shock.

M&M Control is proud to represent Trerice Products!
