Titan Flow Control, Inc.

April 2022 Featured Mfg.

"Your Pipeline to the Future"

[More information](#)

Titan Flow Control manufactures a wide variety of industrial and commercial high quality pipeline strainers, double disc check valves, globe type silent check valves, soft seated butterfly valves, pump protection products, and additional pipeline accessories. Titan also produces complex fabricated products, custom design units, and specialty screens.

Pipeline Strainers & Check Valves

- **Y-Strainers** remove unwanted debris from the pipeline flow and protect downstream equipment.

- **Basket strainers** are used in horizontal pipelines where debris loading is high and the collection of solids is required.

- **Duplex Strainers** divert flow from one basket chamber to allow cleaning of the other basket chamber without shutdown.

- **Check valves** prevent the system from draining if the pump stops and protect against backflow. Designs include globe, wafer, or threaded style, dual or single disc check valves, and full body swing check valves.

Fabrications, Pump Protection, Butterfly Valves, & Ball Valves

- **Fabricated products** provide additional flexibility and design options for unique applications.
- **Pump protection** specialty products include suction diffusers, tri-flow control check valves, and foot valves.
- **Butterfly Valves** are lightweight, quarter-turn valves used for regulating or isolating pipeline flow.
- Titan Flow Control offers **ball valves** for automatic cleaning and blow-off.

M&M offers a full line of **Titan FCI** items.

Call **M&M Control** for help with your application.
