Spence Valve steam specialty and fluid control products meet the needs of HVAC and industrial marketplace requirements. Spence engineering technology offers maximum application and selection flexibility to optimize commercial, institutional, and critical applications of your industrial steam system. Product includes temperature and pressure regulators, control valves, steam traps, pilots, and more.

Spence Regulator Portfolio

The E Main Valve can be controlled by various types of interchangeable pilots. Spence regulators are known for their universal adaptability, accurate regulation, dependable service, and low maintenance costs.

Pilots customize your regulator to meet your specific application, and control pressure, temperature, differential pressure, or back pressure either mechanically or with a pneumatic pilot.

Control Valves are offered in a diverse selection for a wide range of applications. Models include the Type J Valve and the K Series Types K1, K3, & K4 Valves.

Pneumatic and electric actuator designs control mixing or diverting applications, or for economical control of steam, water, gas, and process applications.

Direct Operated Valves provide pressure and temperature control for your application. The 2000 Series is a self-operated temperature regulator available with single or double seat in direct or reverse acting. Also available with two seat areas for 3-way mixing.

Spence Steam Traps for critical applications serve a variety of applications including drip & tracing, process, and HVAC.

Traps include mechanical, orifice, thermostatic, thermodynamic, and clean steam product designs in addition to condensate pumps, piping specialties, and other accessories.

M&M offers a full line of **SPENCE** items.
