Watson McDaniel

Precision Manufactured Steam Products

Made in the USA

Since 1878

Steam & Fluid Specialty Products

Watson McDaniel manufactures a wide range of high-quality, time-tested steam specialty and fluid products for the industrial marketplace.

[HB Series Control Valve w/Pneumatic Actuator](#)

[Direct-Operated Pressure Regulators](#)

[W94 Self-Operated Temperature Regulator](#)

[Pilot-Operated Regulating Valve](#)

Watson McDaniel's HB Series 2-Way or 3-Way [Control Valves](#) are offered with a pneumatic actuator with optional positioner, or with an electric actuator.

W91/W94 Self-Operating [Temperature Regulators](#) require no external power source and are used for accurately controlling temperature in both heating and cooling applications.

HD Series Pilot-Operated [Regulating Valves](#) use several different control pilots mounted to the valve to control pressure, temperature, or a combination of both. Designed for extremely accurate control of temperature and pressure in steam service applications.

[Steam Traps](#)

[Pumps w/Receiver Tanks](#)

Steam Traps are essential components of any steam system to discharge condensate, air, or other non-condensable gases from a steam system while preventing the loss of steam.

Watson McDaniel offers an extensive line of steam traps to handle any application.

Complete packaged skid systems include one or more Pressure Motive Pumps (PMPs) along with a vented receiver mounted on common base. The receiver collects condensate that then flows into the pump tank, temporarily storing it during the PMPs' discharge cycle when the pump tank pressurizes with steam.

M&M offers a full line of Watson McDaniel products.

Call M&M Control for help with your application.
