KUNKLE VALVE

800-876-0036

Quality | Safety | Performance | Control

E.B. Kunkle worked for the Pennsylvania Railroad during a time when serious injury and mechanical problems could result from over-pressure of locomotive engines. In 1875, Erastus Boise Kunkle revolutionized the industry when he invented the "lock-up pop safety valve" designed to relieve steam engine pressure. In 1876, Kunkle began manufacturing the valve through E.B. Kunkle & Co., proprietors of the Fort Wayne Safety Valve Works.

Ask for Kunkle because . . . not just any valve will do!

Model 300 & 600
Air/Gas/Steam

Series 6000
Safety Valves

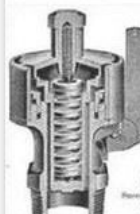

Models 1 & 2
Safety Valves

Model 537
Safety Relief

This Fort Wayne Safety Valve Works model 86E 1 1/4" Lock-up Pop Safety Valve is stamped with Kunkle's original patent date of 1875.
